MCW STUDENTS, FACULTY, RESIDENTS AND CLINICAL/RESEARCH FELLOWS MENTORED:

Medical Students

01/2012 - 05/2016 Amanda Scheuerman (Robinette), Medical Student Advisor, Medical College of Wisconsin, Matriculated MCW Pediatric Residency

08/2013 - 05/2014 Ashish Shah, Capacity (Medical Student Advisor), Medical College of Wisconsin, Matriculated University of Minnesota Medical Center Pediatric Residency

Residents

09/2016 - Present Josh Pohlman, Professional Mentor, Medical College of Wisconsin, MCW Pediatric Imaging Fellowship

EXTRAMURAL STUDENTS, FACULTY, RESIDENTS, AND CLINICAL/RESEARCH FELLOWS MENTORED:

Undergraduate Students

10/2013 Samuel Walther, Pre-med clinical shadowing and mentor, Des Moines University

06/2015 Maxwell J. Jentsch, Pre-med clinical shadowing and mentor, Kansas City University of Medicine

05/2019 Ryan Burd, Pre-med clinical shadowing and mentor, Matriculated

Residents

08/2014 - 12/2014 Shanthan Tumu, Capacity (Research Mentor), Wheaton Franciscan, Peer reviewed educational exhibit

08/2014 - 12/2014 Adam Gehrt, Capacity (Research Mentor), Wheaton Franciscan, Peer reviewed educational exhibit

PROGRAMMATIC DEVELOPMENTS:

Educational Programs

Student

01/2013 - Present Pediatric Radiology Elective Rotation Orientation, Curriculum, and Online Course Development Developed a rotation curriculum and a course website to connect students with orientation materials, schedules, conferences and education resources.

Fellow

01/2013 - Present Pediatric Radiology Fellowship Orientation, Curriculum, and Online Course Development Revised rotation curriculum and developed a course website to connect fellows with

orientation materials, schedules, conferences and education resources.

Resident

01/2013 - Present Pediatric Radiology Rotation Orientation, Curriculum Revision, and Online Course Development Developed an orientation and educational rotation guide, revised curriculum and created a course website with educational materials for rotating diagnostic radiology residents from MCW, St Luke's and Wheaton Franciscan residency programs

01/2016 - 06/2016 Pediatric Radiology Didactic Core Curriculum Series Developed a pediatric radiology residency core didactic two-year curriculum delivered on a monthly basis with virtual access to local community residency programs.

05/2016 - 06/2016 Pediatric Radiology Rotation Call Revision Led change in pediatric radiology residency rotation call structure to a night float system subsequently modeled by the MCW Diagnostic Radiology

Faculty

01/2013 - Present Pediatric Imaging Department Intranet Site Leveraging existing PACS© communicator software (Primordial©) developed an intranet site allowing quick access to procedures/policies, schedules, and educational/reference materials to improve daily pediatric radiologist workflow.

Clinical Programs

01/2013 - Present Developed Fetal MRI imaging program

02/2013 - Present Developed imaging pathway and revised MR Enterography protocol for patients with inflammatory bowel disease

03/2014 - Present Developed and implemented Whole Body MRI technique and protocol

08/2014 - Present Pediatric Imaging Standardized Dictation Templates Led the initiative, buy-in and development of standardized dictation templates used by the pediatric body section to improve communication and efficient use of reports by the referring providers.

07/2017 - Present Virtual Pediatric Radiology Consult Developed a means of providing an interactive virtual radiology consult to discuss and view imaging cases remotely on and off campus. Leveraging existing WebEx© software and PACS© integration, pediatric radiologists and referring providers are now able to be connected regardless of location.

05/2019 - Present US Bowel evaluation in NEC Organized a multidisciplinary workgroup consisting of Pediatric Surgery, NICU and Imaging to develop a US imaging protocol and pathway for the evaluation of necrotizing enterocolitis.

07/2019 Small Bowel Challenge Protocol Coordinated efforts between General Surgery, Epic Radiant Team, and Imaging technologists to develop a small bowel follow though and potential therapeutic contrast challenge for patients with suspected bowel obstruction.

08/2019 Outside Imaging Request Developed and coordinated the creation of an outside imaging request option integrated into the protocols for all imaging exams. The button request when checked is then directed to the file room for completion. Leveraging our current EPIC infrastructure the process provides an efficient workflow for radiologists and technologists to request patient information.

11/2019 CT Trauma Order Simplification Developed and coordinated a simplified ordering workflow for the trauma service, ED and imaging technologists when ordering trauma CTs in real time. The workflow optimization simplifies ordering and eliminates any potentials delays of order entry and EPIC/PACS integration. The patients are scanned quicker and images available sooner to the radiologists for interpretation.

02/2020 Fluoroscopy Contrast Consolidation and Protocol Updates Organized and led the transition of reducing the number of contrast agents used in our department thereby simplifying protocols, reducing cost and improving workflows.

01/2021 Child Maltreatment Imaging Consult Team In coordination with a multidisciplinary team, organized and developed a Child Maltreatment Imaging consult team and workflow. The concept has since been used by other departments in CSG to develop a similar consulting pathway.

01/2022 Enteric Tube Checks by Technologists Developed and coordinated a protocol and workflow to convert typical Fluoroscopy performed enteric tube studies to technologist driven xray exams for evaluation of G, J and cecostomy tubes. The workflow improved efficiency, flexibility, provided cost savings and professionally engaged the imaging technologists.

05/2022 Intussusception Workflow In coordination with a multidisciplinary team, organized and

developed a intussusception workflow allowing a pathway for delayed reduction attempts and avoiding unnecessary surgical intervention.

06/2022 Technologist driven CT protocols Led a initiative with imaging administrative leaders to develop a workflow and hospital policy to allow CT technologists to protocol typical emergency/STAT driven CT exams.

01/2023 Airway Technique Learning Module for Technologists Developed a learning/best practice module for xray technologists in coordination with Anne Coleman, RTR. The module includes tips and techniques with pictorial representation to help standardize the approach to obtain high quality pediatric airway radiographs.

11/2023 Safety Notification to Identify Patients With Renal Disease In an effort to improve contrast administration safety I partnered with the radiant team to develop a notification of patients with renal disease at the time of exam protocol. The notification appears at the top of all imaging protocols next to the patients name. The identifier allows more efficient identification of a patient that might be at risk in receiving contrast.

06/2024 Transition to StatRad overnight teleradiology service at CW Played a key lead role in communication, workflow and protocol development across all modalities and critical referring hospital providers to help successfully initiate an overnight teleradiology service line.
