2021 Core Curriculum Lectures for Fellows (total 6 hours of lectures): “Medical Management of Obesity”, “Obesity, lipids, diabetes – Board review”, “Endocrine emergencies”

2022 - 2023 Core Curriculum Lectures for Fellows: Intro to Research

2022 Core Curriculum Lectures for Fellows: "Obesity Basics and Genetics",

EXTRAMURAL TEACHING:

Medical Student Education

2008 - Present VAMC/FMLH, Endocrinology consult attending

2008 - Present VA Medical Center, A ward attending for General Internal Medicine

2008 - Present Froedtert Hospital, A ward attending for General Internal Medicine

Resident and Fellow Education

2008 - Present Froedtert and VA, Endocrinology consult attending at the VA and FMLH for approximately 12 weeks every year since 2008, and have interacted with a number fellows rotating in Endocrinology rotations both on inpatient consult service as well as in clinics.

2008 - Present I have been a ward attending for general medicine at both VA as well as at Froedtert Hospital for at least 4-6 weeks every year since 2008 and have been a teaching attending for a number of residents. In addition, I have been Endocrinology consult attending at the VA for approximately 12 weeks every year since 2008

Community/Lay Public

06/02/2022 - Present Wisconsin Public Radio, How Medical Professionals Discuss Obesity interview on The Morning Show

MCW STUDENTS, FACULTY, RESIDENTS AND CLINICAL/RESEARCH FELLOWS MENTORED:

Medical Students

05/2012 - Present Kevin Ciriacks, Medical College of Wisconsin, Under my supervision, Kevin evaluated the effects of simvastatin and ezetimibe in lowering LDL cholesterol in subjects with type 1 and type 2 diabetes, results of which have been published in the following manuscript.

01/2013 - Present Mitchell Guenther, Medical College of Wisconsin, Under my supervision, Mitch analyzed the effect of adiposity distribution on adiponectin levels, results of which have been published in the following manuscript. He is also a co-author on a publication authored by Dr. Ahl

06/2015 - Present Sindhu Kilakkathi, Medical College of Wisconsin, Under my supervision, Sindhu is working on different methods of measurement of adiposity among African Americans. She is analyzing a couple of different databases to find best anthropometric predictor of cardiometabolic risk among African Americans. A manuscript is under preparation.

Graduate Students

2009 - 2010 Jennifer Verre, MD, A Community Assessment of Diabetes in the Milwaukee County, Wisconsin”, Medical College of Wisconsin, Served as site-preceptor, Capstone Project advisor and reader for the completed projects

2009 - 2010 Graciella Villadoniga, MD, "Applying the Chronic Care Model to Diabetes Mellitus: Does its application improve Diabetes Mellitus outcome? A literature review", Medical College of Wisconsin, MPH Student on Capstone Project

2011 - 2012 Gerard Coly, MD, "Perceptions of clinical research among African Americans", Medical College of Wisconsin

Clinical/Research Fellows

2011 - 2013 Sujani Poonuru, MD, Fellow in Endocrinology, MCW, Medical College of Wisconsin, Under my supervision, Dr. Poonuru presented a rare case of pseudohypercalcemia at the Endocrine Society Annual meeting in 2014. She won an endocrine fellow travel award for the poster presentation.

2013 - 2015 Scott Ahl, DO, Fellow in Endocrinology, MCW, Medical College of Wisconsin, Under my supervision, Dr. Ahl has shown that circulating adiponectin levels are associated with lower waist-to-hip ratio and better metabolic health. This manuscript has been accepted for publication.

2013 - Present L. Rosemary Rengel, MD, Fellow in Cardiology, MCW, Medical College of Wisconsin, Under my supervision, Dr. Rengel has demonstrated that the adipose tissue secretion of adiponectin differs based on adipose tissue dept. This abstract was presented at the AHA Scientific Sessions and Dr. Rengel was awarded MCWAH Research Award for the year 2015. This manuscript is in preparation for publication.

2013 - 2015 Namrata Dass, MD, Fellow in Endocrinology, MCW, Medical College of Wisconsin, Under my supervision, Dr. Dass has shown that the effect of adiposity on vascular endothelial function differs based on gender among young African Americans. This manuscript is under preparation.

Residents

2013 - 2014 Christine Webber, DO, Medical College of Wisconsin, Resident in internal medicine, MCW

2015 - 2016 Kristin Kopish, MD, Medical College of Wisconsin, Under my supervision, Drs. Webber and Kopish have completed metaanalyses looking at the effect of pre-operative glycosylated hemoglobin on post-operative outcomes among patients with type 2 diabetes. Kristin is presented this poster at the Endocrine Society, 2016 and also won Best Poster award at Department of Medicine Research Day.
